

Nipper Alert Two Way Global Contaminated Food and Feed Alert Network

Contaminated Food and Feed Alert Network (CFFAN) or Nipper Alert

- ❖ The opt-in, subscription-based network is intended to protect the public while taking a big step toward preventing sicknesses and deaths caused by contaminated food or ingredients.
- ❖ When contaminated food or feed accidentally enters the market, the network is designed to quickly alert and warn:
 - The public
 - Specific individuals who are able to take immediate action on the alert information to stop contaminated food or feed could while still in the supply chain
 - People in the related manufacturing and distribution supply chain companies
 - Health Care, Schools, Vet's, Shelters, Restaurants, Retailers etc.
- **Developed :**
 - ❖ With Government monitoring organizations such as FDA & CDC.
 - ❖ Using Common Alerting Protocol (CAP)* used for Amber Alerts and Severe Thunderstorm Alerts, the intent is to produce and implement a Similar to the Amber Alert and Severe Thunderstorm Alert
- ❖ User-defined delivery parameters including active push technology including text podcasts, audio podcasts, video podcasts, robotic calls to mobile, office and home phones, digital signage networks, RSS etc.
- ❖ Leverage
 - Advanced small-group web conferencing communications technology to coordinate emergency responses
 - User Generated Content to help define “clusters or patterns”
 - An “All Clear” sent
